EXPERIENCE

- Create inspiring design that works well.
- Conduct design stages from concept to final project hand-off.
- Collaborate with team members to develop digital products independently.
- Develop personas and workflows for user stories.
- Collaborate with technologists to implement design into code.
- Develop a simple CRUD system using React JS with an intuitive and user-friendly interface, enabling users to manage and organize data effortlessly while providing seamless and dynamic experiences.
- Integrate APIs using React JS framework to build web applications and create efficient RESTful APIs.

PROJECTS

FARI SANDIKA - Personal Projects   Feb 2022 - Feb 2023

- **Movies Website** integrated with an API using React JS and also utilizes DaisyUI for a user-friendly interface to allow users to easily discover new movies.
- **The Company Profile Website** was designed and implemented using Figma and React JS.
- **The Personal Portfolio Website** enables users to learn more about me by showcasing my blogs, achievements, and portfolios.
- **The E-commerce Website** Design was designed and sliced using Figma and HTML.
